

FSU Program in Neuroscience presents...

BRAIN FAIR SAFARI

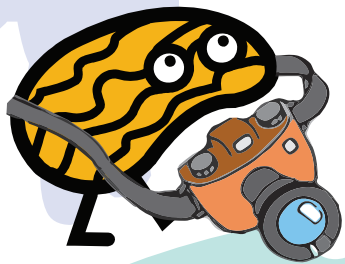

when: Saturday, April 11th, 1pm - 5 pm
where: FSU Department of Psychology
1107 W. Call Street

Brain Fair 2015

An event for kids of all ages to learn how their brains work.

The Neuroscience Program at Florida State University is excited to announce the fourth annual Brain Fair. This year, come discover the hidden secrets of your brain with a trip through our Brain safari! The Brain Safari offers something remarkable for all ages. Come build your own neuron, watch the neurons within you fire, witness your senses in action, observe real brains, and discover many more phenomenon you didn't even know existed! As an added bonus to your journey, you'll also learn about which animals have "super senses" that help them thrive and survive. Take heed, this journey is for the adventurous scientist within you!

hear leading scientists present the latest in brain research
see demonstrations about how the brain works
participate in hands-on brain activities
and much, much more!

**FREE and open
to kids of ALL AGES**
